

5th Grade Math

Adding & Subtracting Fractions

Digital Escape Room

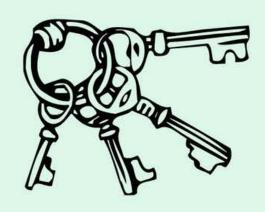

Standards 5.NF.A.1 5.NF.A.2

5th Grade Math Skills

Add & subtract fractions and mixednumbers with unlike denominators (with regrouping).

fast facts

- 2 Differentiated! Two levels of difficulty
 - No prep, click & go! Optional printable pages
- Secape Time ~45-60 minutes
- Best used in pairs or small groups
- Requires internet connected device
- Self-Checking
- Virtual or in-person
- Four Engaging Puzzles

How it Works:

- The escape room is automated by a Google Form™ (Google™accounts are not required).
- Use the quick start link to click & go, or create a copy of the form to save to your drive (the teacher must have a Google Account to save a copy).
- Students only progress through the puzzles when correct answers are entered.
- The form provides hints if students enter incorrect answers.

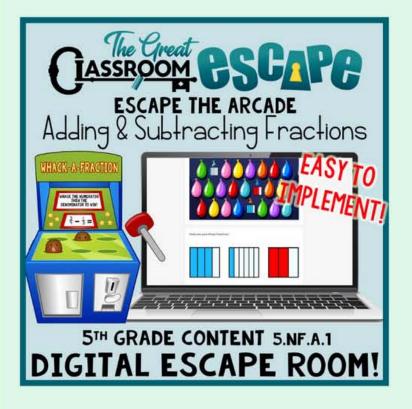

Two Versions for Differentiation

Version A More Challenging

- Very challenging! Best used in small groups
- More fraction problems
- Some hints provided
- Multiple steps to complete before entering code

Vension B Easien

- Best for pairs or small groups
- Fewer problems
- More hints provided
- Puzzles are broken down into smaller parts to complete

For an "easier" adding & subtracting fractions escape room, please see escape the arcade! This product includes fractions with unlike denominators, but not mixed-numbers or regrouping.

Puzzle Preview Version A (More Challenging)

Chocolate Chili Bars

Ingredients:

3/8 pound dark chocolate 1/4 pound milk chocolate 1/16 pound cocoa powder pound ground chili 3/16 pound cinnamon sugar

Measure all ingredients and combine in a double boiler. Stir constantly until metted. Pour into molds and let chill 3 hours.

A key you seek, A key I have found.

CCLLCV >NO

>C JUO J C<LL 70<00.

/ v		/	Z	1

When following a chocolate recipe Understanding fractions is the key. Let's see how you do with these little hints. You'd need to solve them to make chocolate mints.

What's the combination? I'll give you a clue. It starts with a fraction with a denominator of 2. You'll need to simplify once again Because the numerator in this fraction is 10.

The second number in the combo is what you'll see Starting with a numerator of 10 and denominator of 3 Add this to another fraction with this mix: A numerator of 16 and denominator of 6.

The last number is tricky, I have to say. Start with of and take & away. Take away another of and what have you got? You have the combination, give the lock a shotl

$$\frac{1}{8} + \frac{1}{2} = 1 \frac{1}{4} - \frac{1}{2} = \frac{1}{12} - \frac{1}{6} = \frac{5}{6} - \frac{1}{2} = \frac{1}{3} + \frac{1}{6} + \frac{1}{12} + \frac{1}{12} = \frac{2}{3} - \frac{1}{9} = \frac{1}{4} + \frac{1}{8} = \frac{1}{4} + \frac{1}{4} + \frac{1}{4} + \frac{1}{4} = \frac{1}{4} + \frac{1}{4}$$

My family only bought one chocolate bar a year It had to be shared three ways, I fear. My brother got % and my sister got 1/2. What was left for me? That was absurd! Pied GWI

Don't forget to simplify. Think you're ready

Think you're ready? give it a try.

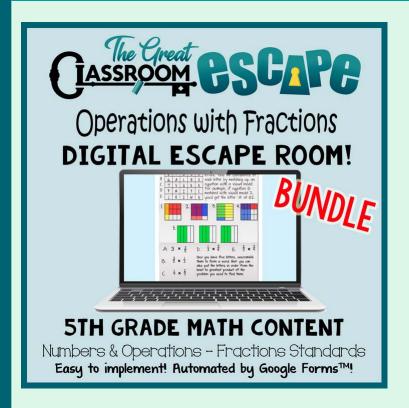

Type the final answer, and you will see if you've done enough to get your key. ealew

The unit of measure is a pound.

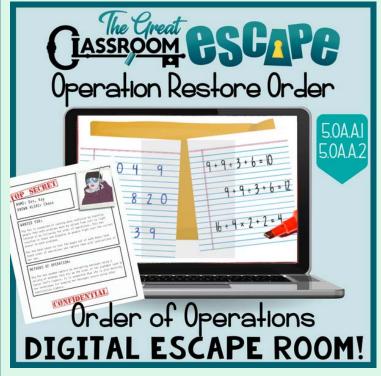

No need to type a label, how does that sound?
